

P.E.P. TECHNOLOGY[®]

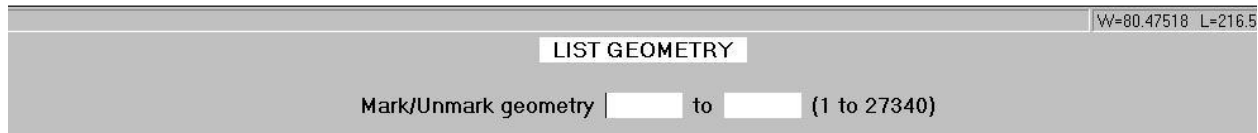

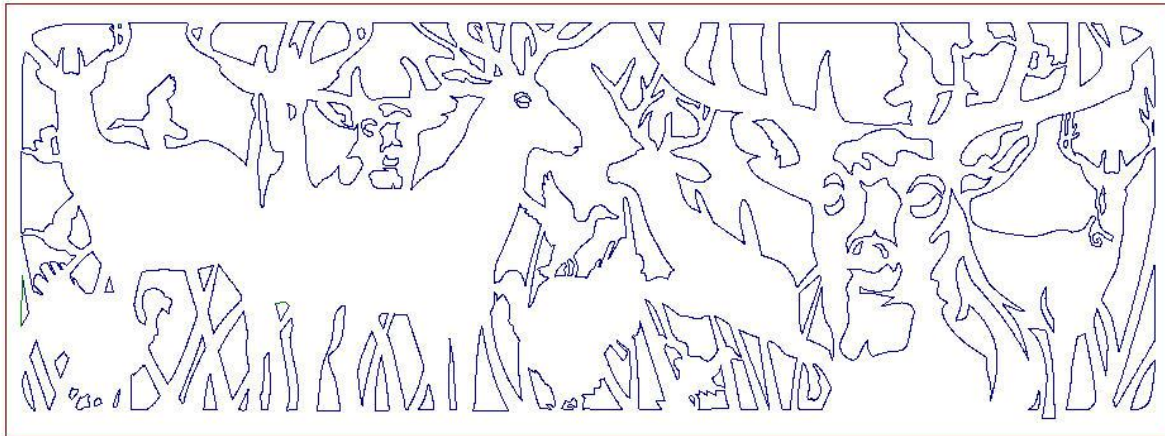

Tomorrow's Automated Manufacturing Technology.... Today!

P.E.P. PROCESSES TWO DAYS OF WORK IN MINUTES

ANCHOR FABRICATION took 2 days to manually process the CAD file below. Using the P.E.P. 2006 CAD CONVERTER the same file was **automatically** processed in less than 34 minutes without any user interaction of any kind.

THE REST OF THE STORY

The Cad file below contained 27,340 individual geometries.

Running through the CAD Converter eliminated more than 10,000 geometries and output a perfect cutter path with no gaps, no overlaps and no duplicate geometry.
