P.E.P. (MEASUREMENT MASTERS, INC.)

I am writing to tell you about the success we have had with your product. Since we have begun using your product, our production has gone up thirty percent. Our six day work week has gone to less than five days, for the same amount of work. Your software is simplistic, productive, and yet highly technical.

Your software has our TRUMPF lasers and punching machines working at their peak efficiency. Our programming department is also working at a maximum efficiency. The CAD converter saves us an unspeakable amount of time. We look forward to a successful future with the influence of your software.

Sincerely,

Matt Lytton
Programmer
