

P.E.P. TECHNOLOGY[®]

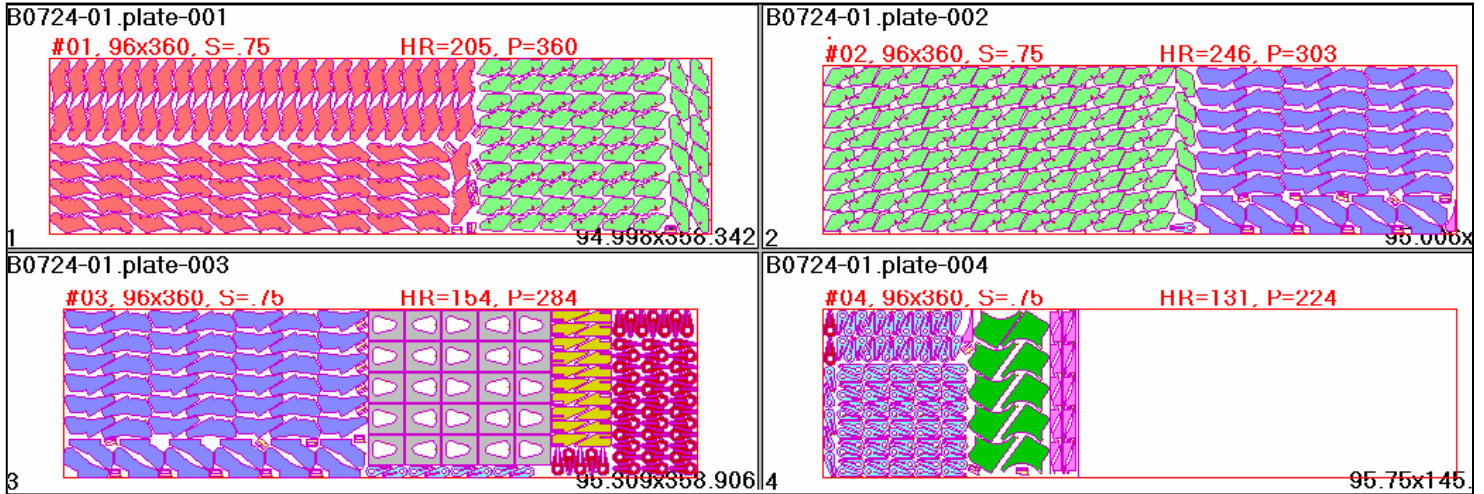

SFI of Ohio Success Story

Material Yield Jumps dramatically on Lasers & Plasma Machines @ SFI Ohio

An Interview with Brian Bowling at SFI Ohio.

After programming with Optimations for 4 years I could not believe how FAST and how EFFICIENT the P.E.P. nests are. Instead of waiting 10 minutes for a single plate, P.E.P. will create multiple plates within one nested program, each plate taking less than a minute. Best of all - its automatic in P.E.P.!

You have a wonderful product. I highly recommend P.E.P. to anybody that needs nesting software!

The nests above and to the right were created automatically by me using P.E.P..

Thanks P.E.P.

Brian Bowling
Estimator / Engineering
