Subject: Real Time AS400 / BAAN ERP Integration with P.E.P.'s WIP software

Dear Measurement Masters,

I want to compliment you on a job well done. The task of integrating our BAAN ERP software with the P.E.P. WIP Fully Automated Manufacturing software module was a success. Your staff was knowledgeable, friendly, and very patient when ever we needed help, or had a question.

Integrating the P.E.P. WIP Fully Automated Manufacturing software module into our BAAN system went very well. Our two IS people spent approximately 16 hours total to get the information and communication needed on our AS400 and ERP system. To overcome some legacy issues in our system, your support person quickly arrived at a solution and in a short time had useable data ready for WIP. Only once did our AS400 / BAAN administrator need to make a data format change. I haven't needed to talk to our IS dept on this subject since the initial installation.

A project that some would have expected to take weeks was accomplished in just a few days and it could not have been done had we not had the expert help from your company.

The end result is that we have increased our efficiency, eliminated order errors, and created more time for us to pursue other tasks.

Thank you and please continue the steady improvements and advances to your product.

Sincerely

Dave Mader
